

Peace White Paper

We need to stop wars.

Peace White Paper Contents

1. Project Overview

Throughout history, people are always the greatest victims in wars. A war has caused an indelible negative impact on the world economy and people's livelihood, and it has also turned many people in the world into refugees...Such as World War II, which was a global military conflict that lasted from 1939 (even 1931) to 1945. It was also the largest number of civilian deaths on record, with a total death toll of 70 million, making it the deadliest war in human history. We love peace and don't like war, but in this world, the sound of guns, artillery and explosions is far more than the sound of firecrackers and salutes. We against war and dislike it because the days of war are full of artillery fire. A large area of thick smoke is everywhere, which not only pollutes the air and ozone layer, but also makes many people lose their lives, relatives and homes. Looking at the current Ukrainian Russian war, not only many people are wrapped up in clothes, but also the number of refugees in the world has increased again. We aim to call for peace and against war.

2. Charity

The Peace Project announced the launch of the first world's DAO autonomous charity project using the concept of the metaverse, and established a "decentralized autonomous organization Peace DAO", allowing donors to directly participate in the management of their donations. Each Peace Coin holder's tax generated from each transaction will donate part of the money to the refugees displaced in the war. The Peace Community banded with Red Cross will donate to the refugees in the war through the open source blockchain intelligent contract. Team hopes to become the first world's "decentralized charity Pecae" use fashion abnormality is the story of the background as the breakthrough point, and combined with lovers who like technology and block chain, and decentralized USES block chain technology properties and derivative DAO. Borrowing "United international Red Cross", " The charitable organization decentralized DAO", and "Let the war brings people damage remedied, to give donors and victims what they want and get peace.Let peace in the world."

3、 Technology application

Blockchain technology has four advantages: decentralization, openness and transparency, information traceability and automatic execution through intelligent contracts. These four advantages correspond to the problem that the original charity projects have been criticized. The first is the characteristics of decentralization: blockchain can distribute the information related to Peace charity projects on all nodes of the network. At present, no technology can tamper with more than 51% of the node data on the whole network at the same time, which prevents an organization or individual from manipulating a charity project for their own interests. Secondly, the characteristics of openness and transparency: because all the information on the blockchain is open to the whole network, relevant people can query and trace each transaction. In this way, we can know who the corresponding recipient of each donation is, how to use it, how many times it has been distributed, how the relief effect is, and so on. We can query and trace the relevant responsible person point-to-point. Thirdly, the characteristics of information traceability: the donor and the donated project are directly related, and each payment flow is stored on the chain. All parties can check and supervise, and know every donation like the back of their hands, so as to ensure the openness and transparency of public welfare projects. Finally, the use of Peace intelligent contract solves

the complex processes and black box operations in traditional charity projects. We only need to set the relevant conditions and requirements, and the intelligent contract can be executed automatically. The charitable and public welfare projects supported by blockchain technology let us understand the whole process of the project and the information of relevant personnel involved, and no longer worry about the authenticity and black box operation of the project. In this way, we can focus more on the charitable and public welfare projects themselves.

4.Token Allocation

Taken name : Peace

Distribute chain : BSC

Total issuance : 840000000

Black hole destruction(Locked for 100 years): 53%

Charity supplies(locked for 2 months): 2%

Pre-sale: 25%

Mobility: 15%

Charity marketing(locked for 2 months): 5%

Transaction fee: 10% tax for each transaction (3% for refugee donation, 2% for destruction and 5% for marketing)

Contract address : 0x7692b37848dc1520F8cA16D05e7330Bc383D5659

- Black hole destruction: 53%
- Charity supplies: 2%
- Pre-sale: 25%
- Mobility: 15%
- Charity marketing: 5%

5、 Vision planning

According to the statistics of UNHCR, there are nearly 84 million refugees in the world so far, and the number of refugees is gradually increasing all the time. The vision of peace project is to stop all wars, curb the growth of the number of refugees, and then further reduce the number of refugees. As long as the world is peaceful, peace will make great efforts to this end. There has never been a good war, nor a bad peace. -- Franklin

6、 Declaration of peace

Article 1

Everyone has the right to peace, so that all human rights can be promoted and protected and development can be fully realized.

Article 2

States should respect, practice and promote equality and non discrimination, justice and the rule of law, and protect people from fear and want, so as to establish peace within and among societies.

Article 3

States, the United Nations and the specialized agencies should take appropriate sustainable measures to implement the present declaration, in particular the United Nations Educational, scientific and cultural organization. International, regional, national and local organizations and civil society should be encouraged to support and assist in the implementation of this declaration.

Article 4

International and national institutions for peace education should be strengthened in order to strengthen the spirit of tolerance, dialogue, cooperation and solidarity for all. To this end, the University for peace should contribute to the major task of extensive peace education through participation in teaching, research, graduate training and knowledge dissemination.

Article 5

Nothing in this declaration shall be construed as contrary to the purposes and principles of the United Nations. The provisions contained in this declaration must be understood in accordance with the Charter of the United Nations, the Universal Declaration of human rights and relevant international and regional instruments ratified by States.

7.Team

R3 Blockchain Alliance:

At the end of 2015, R3 CEV, a technology company of Internet finance, gathered an alliance composed of 42 well-known banks to study and discover the application of blockchain technology in the financial industry. The world's top financial institutions, including Barclays, Credit Suisse, Morgan Stanley, Goldman Sachs, HSBC, ING, etc., work together through this alliance to figure out how blockchain should be used in the financial industry.

Nansen International Refugee Organization:

It is an organization founded by the League of nations in 1930, named after the famous explorer and social activist Friedrich Nansen. The purpose of the organization is to inherit Nansen's will and provide relief to refugees after his death. In 1933, 14 international conferences on the prohibition of refugee persecution were held in Geneva. Second, providing legal protection for refugees. They have applied for identity cards, visas and residence permits for many refugees, focusing on the relief of the elderly, the weak, the sick and the disabled. The third is to provide economic assistance to refugees and encourage them to save themselves. In the eight years of the office's existence, it has helped nearly 1 million refugees.

Michael kobanian:

Founder of cryptocurrency community in Kiev and spiritual leader of Ukrainian blockchain. We strongly call for an end to the war and the right of everyone to peace.

Anatoly Kaplan:

Founder of forklog's cryptocurrency news website and a famous anti war figure, participated in the United Nations humanitarian relief operation in 2016 and was awarded the United Nations peace Ambassador medal.

Pavel Kravchenko:

Co-founder of the distributed lab and the organizer of the blockchain rooftop annual conference, dedicated to the research of blockchain technology to improve the world.

8. Road map

Q1: Peace, together with the "International Red Cross Society" and the "decentralized charity Dao organization", plans to start sending materials to the refugees in the war through fund-raising in February, and go to the front line of the war with Nansen international refugee organization to provide medical assistance to the refugees.

Q2: Peace will jointly publicize and promote the blockchain's global communities and industry's top we media platform resources, launch this charity fund-raising activity in the blockchain industry, and plan to launch major centralized exchanges such as Huo coin and Qian'an in April.

Q3: Peace will issue NFT of charity projects and unite with "International Red Cross", "decentralized charity Dao organization" and "Nansen international charity organization" to empower it, and use the funds obtained from NFT for charitable donations to refugees.

Q4: Work hard for peace cause forever.
